WELCOME

Advanced Pain Medicine, PSC, would like to welcome you to our clinic. We specialize in the assessment, diagnosis, and treatment of acute and chronic pain.

Our pain management mission is to restore an overall quality of life for individuals struggling with pain. We accomplish this through interventional pain medicine by treating the source of the pain. Interventional pain medicine is a sub-specialty of pain medicine, which uses injections and minimally invasive techniques to diagnose and treat painful conditions.

We will complete a thorough evaluation and discuss your specific treatment plan during your first visit. If you are currently taking prescription medications for pain, we will evaluate the effectiveness of the medicines and make appropriate recommendations if needed. Advanced Pain Medicine, PSC will not take over writing for narcotic prescriptions that you are receiving from another physician.

Be prepared to arrive 15-minutes early for your appointment to complete the needed paperwork. If you are unable to keep your appointment, please give us 48-hours notice. Neglecting to do this may result in a cancellation fee that is not covered by your insurance company.

“There is no greater specialty that one that can relieve human suffering and chronic pain. It is truly a privilege to be able to treat chronic pain and provide hope to patients without hope.”

- Saroj B. Dubal, MD, DABPM
Medical Director
